Collection

April 29th 1888.

A Vesical Urinary Calculus XX
removed by Lithotomy
weighing 1 oz & 23 grs. troy
oblong oval. *marked* 5065

From the Gibson
Collection

April 29 1888

Two Vesical Urinary Calculi XX
removed by Lithotomy. ^{larger} ~~smaller~~
weighing 1 oz. 53 1/2 grains
The other 1 oz. 48 grs.
Troy both smooth and slatten- 5066
ed on two sides and
by contact with other
calculi in bladder
marked "Baum".

From the Gibson
Collection.

April 29 1888.

Two Vesical Urinary Calculi XX
removed by Lithotomy,
fusiform, apparently
phosphatic, with facettes 5067
smoothed by introvesical
attrition. The larger weighs
1 oz. 331 gr. the smaller 172 grs.
(Both 2 oz. 23 gr.)

From the Gibson
Collection.

April 29 1888

A vesical Urinary Calculus XX
removed by Lithotomy
from a boy six years 5068
of age. Its weight is 40 grs troy
Presented to Prof Wm Gibson
1853 by William H. B. Goodwin.

From the Gibson
Collection

April 29 1888

Fragment of
a Vesical Urinary Calculus XV
removed by Lithotomy by
Dr. P. C. Spencer, of Peter- 5069
burg Va. weighing 21 grs.

From the Gibson
Collection

April 29 1888

Two

Vesical Urinary Calculus
removed by Lithotomy
from the bladder of Mr.
McDaniel. They are irregular
oval. The larger weighs
1 oz. 113 grs. the smaller 1 oz.
82 grs. Troy.

XX

From the Gibson
Collection

5070

April 29, 1888.

A Vesical Urinary Calculus
removed by Lithotomy
weighing 2 oz. 328 $\frac{1}{2}$ grs.

XV

From the Gibson
Collection

5071

April 29, 1888.

Two fragments of a
~~phosphatic~~ calculus
removed in 1835 by lithotomy
weighing 29 grs.

XV

From the Gibson
Collection.

5072

April 29, 1888.

A large regularly flattened
oval phosphatic calculus,
removed by lithotomy
The outer layer has been
crumbled away.
It weighs 1 oz. 178 grains Troy.

XX

From the Gibson
Collection.

5073

April 29, 1888.

Prismoid vesical urinary
calculus weighing 1 oz.
37 grs. Troy.

XX

From the Gibson
Collection.

5074

April 29, 1868.

A vesical urinary calculus
laminated, hard, oval-
with a rather rough
surface, broken at one
end, weighing 452 grs.
troy. It is defaced by
attempts to saw it.

x4

From the Gibson
Collection.

5075

April 29th 1888.

Fragments of a large
vesical urinary calcu-
lus, dark colored, friable.

x4

From the Gibson
Collection.

5076

April 29th 1888.

Fragments of
a vesical urinary
calculus, white,
friable.

x4

From the Gibson
Collection.

5077

April 29th 1888.

Half of
a vesical urinary calculus,
sawn transversely, exhibiting
four or more layers widely
differing in density. The
weight of this portion is 324½
grains troy.

x4

From the Gibson
Collection.

5078

April 29th 1888.

An oblong ovoid
vesical urinary calculus
weighing 366½ grains troy

x4

From the Gibson
Collection.

5079

April 29th 1888.

A flattened oval
vesical urinary calculus,
white, brittle.
weighing 244 grs. try

xx
5080

From the Gibson
Collection.

April 29 1888.

A Vesical urinary calculus
prismatic, oval, weighing
284 1/2 grs. It possibly
to the case of Baum
5066.

xx
5081

From the Gibson
Collection.

April 29 1888.

Vesical urinary calculus
spheroidal, very hard,
dark-brown, weighing 197 grs.

xx
5082

From the Gibson
Collection.

April 29 1888.

A Vesical urinary calculus
lenticular, dark-brown, 5083
hard, laminated, scraped
on two sides to show the layers
present weight 45 1/2 grains.

xx
From the Gibson
Collection.

April 29 1888.

Vesical urinary calculus
ovoid, not very dense,
the outer layer broken off 5084.
of an eighth of the periphery

xx
From the Gibson
Collection.

April 29 1888.

A Vesical urinary calculus, XX
 ovoidal, the outer crust
 crystalline, separated
 over a small space 5085
 present weight $155\frac{1}{2}$ grs.
 marked "S. G. — J. N. Car."

From the Gibson
 Collection.

April 29th 1888.

A Vesical urinary calculus XX
 spheroidal, laminated
 much of the outer layers, 5086
 have been broken off.
 present weight $143\frac{1}{2}$ grs.

From the Gibson
 Collection.

April, 29th 1888

A Vesical urinary calculus, XX
 spheroidal, with a rough
 surface, light colored, 5087
 weight $123\frac{1}{2}$ grs. Troy.

From the Gibson
 Collection.

April 29th 1888.

A Vesical urinary calculus +4
 lenticular, dark green,
 outer layer broken, 5088
 weight 79 grains
 marked "Louis Tonn."

From the Gibson
 Collection.

April 29th 1888.

A Vesical urinary calculus +4
 regularly ovoid, white
 granular surface, 5089
 weight $67\frac{1}{4}$ grs.

From the Gibson
 Collection.

April 29 1888.

A vesical calculus.
fig-shaped, drab-colored
on the sides the outer
layer has crumbled
away. The surface of the
second layer is polished
weight 103 grs. try.

XX
5090

From the Gibson
Collection.

April 29th 1888.

A vesical urinary calculus.
discoid, very porous,
dark grey. a slice has
been separated for analysis
weight $78\frac{1}{4}$ grs.

XX
5091

From the Gibson
Collection.

April 29th 1888.

A vesical urinary calculus
ovoid, rough white sur-
face. weight $7\frac{1}{2}$ grs.

XX
5092

From the Gibson
Collection.

April, 29 1888.

A vesical urinary calculus
small, ovoid, rather smooth
weighing $23\frac{1}{2}$ grs.
In two places where the
outer layer is removed
it is very smooth.

XX
5093

From the Gibson
Collection.

April 29th 1888.

A vesical urinary calculus
white, elongated pyriform
smooth. weight 87 grs.

XX
5094.

From the Gibson
Collection.

April 29th 1888

xx
A fig-shaped dark
brown urinary calculus
weighing $56\frac{1}{2}$ grs.

5095

From the Gibson
Collection.

April 29th 1888.

xx
An irregular rough
white and fawn colored
urinary calculus weighing
 $111\frac{1}{2}$ grs.

5096

From the Gibson
Collection.

April 29th 1888

xx
An ovoidal soft whitish
vesical urinary calculus
weighing $282\frac{1}{2}$ grs.

5097.

From the Gibson
Collection.

April 29th 1888

xx
An irregularly ovoid,
crumbling, phosphatic
vesical urinary calculus
weighing 151 grs. from

5098

From the Gibson
Collection.

April 29 1888

xx
A section of a urinary
calculus with a nucleus
of uric acid, surrounded
by phosphates,
weighing 123 grs.

5099

From the Gibson
Collection.

April 29th 1888.

A urinary calculus ovoid measuring $2\frac{3}{4}$ by $1\frac{3}{4}$ inches weighing 3 oz. 298 grs. try.	XX	From the Gibson Collection.
A vesical urinary calculus very large, smooth on the exterior, sawn open weight.	XX	April 29, 1868. Purchased from the collection of the late Prof Wm Gibson M.D.
A large phosphatic urinary vesical calculus sawn open to show the internal structure	XV	April 30, 1868 Purchased from the collection of the late Prof. W. Gibson M.D.
A large vesical urinary calculus sawn open to show its dissimilar concentric laminae.	XX	April 30, 1868 Purchased from the collection of the late Prof. Wm Gibson M.D.
A large phosphatic calculus.	XX	April 30, 1868. Purchased from the collection of the late Prof. Wm Gibson M.D.
		April 30, 1868.

Calvaria showing ulceration of both parietals and left temporal,	I.D.B. ^a ₃ 5105	Drawn from the collection of the late Prof William Gibson M.D.
Formerly 95 of Gibson collection	✓	April 30, 1868.
of a young subject depressed Cranium, showing, simple Fracture of the left parietal the crown of a trephine having been applied above and below the depression,	X.B.C.c. 8 5106	Purchased from the collection of the Prof William Gibson M.D.,
Formerly 103 Gibson collection.		April 30/1868
Cranium showing Sastre cuts of right parietal a fissure extends nearly to base of left parietal The stand is marked W.S. from Dutarry	I.B.A.a. 17 5107	Purchased from the collection of the late Prof Wm Gibson M.D.,
Formerly 104 of Gibson collection	✓	April 30/1868
Frontal, Sphenoid, Ethmoid and bones of face showing ulceration ^m of absorption of middle of Os frontis	I.D.B. a. 4 5108	Purchased from the collection of the late ^{Prof} William Gibson M.D.
Formerly 98 of the Gibson collection	✓	April 30/1868
Scrofulous ulceration and necrosis of the left tibia.	May 1 st 5109 XV c 16	Presented by Prof. Johnson Eliot M.D., May 1/1868,

Cranium badly fractured
and eroded from Waterloo.
The skull cap is wanting and
also the lower maxilla. A
perforation by a ball appears about the
middle of the left parietal.

+ formerly N° 109 of Gibson Coll.

I.A.B.a.11.

5110

Purchased from the collection
of the late Prof Wm Gibson M.D.

May 1st

A badly injured cranium from
Waterloo. A battered round
musket ball which is with the
specimen has perforated the
right parietal.

I.A.B.a.12

5111

Purchased from the collection
of the late Prof Wm Gibson
M.D.

+ Formerly N° 152 of Gibson collection

Segment of left ^{side of} frontal bone
showing a perforation produced by
a blow

I.B.A.e.1

5112

Purchased from the collection
of the late Prof Wm Gibson
M.D.

+ Formerly N° 126 Gibson collection

Senile skull, the alveolar
processes are absorbed and the
superior maxillaries are destroyed
while the whole surface of the
cranium is eroded as if by *lupus*
exedens

I.D.B.^a5

543

Purchased from the collection
of the late Wm Gibson M.D.

+ Formerly N° 108. Gibson collection

Upper half of right femur
showing a united simple
fracture through the trochanter.
The union is very firm.

XIII.B.B.C.16

5114
